Subject Index

Acari 165
Acetate 161
Acetylene blockage 107
Acetylene inhibition technique 107
Acetylene reduction assay 73, 79
Acid soil 279
Actinomycetes 220
Activation energy 21
Added nitrogen interactions 285
Aeschynomene afraspera 241
Aeschynomene scabra 208
Agrobacterium radiobacter 259
Albizia falcataria 35
Alcaligenes denitrificans 196
Alley cropping 16
Allolobophora molleri 185
Amino sugar 301
Amorphous Fe oxide 144
Anabaena 68
Animal slurry 161
Anoxic zones 137
ARA 73, 79
Arachis hypogaea 215, 275
Atmospheric deposition 189
ATP 79
Availability 9
Azadirachta indica 149
Azolla spp. 241
Azorhizobium caulinodans 208
Azotobacter 79

Bacterial biovolume 253
Barley 9
Beech forest 301
Beech 259
Biodegradation 28
Biofertilizer 241
Biologically fixed N 39
Bradyrhizobium japonicum 196
Bradyrhizobium spp. 275
Brazilian Amazon 153
Butyrate 161

Calcium 153
Canavalia ensiformes 153
Carbon budget 253
Carbon: nitrate ratio 107
Carbonate 229
Cation leaching 153
Chemical availability index 179
Chemodenitrification 21
Collembola 165, 189
Competition 294
Compost 165
Continuous cropping 275
Crop rotations 39
Crystalline iron oxide 144
Cyanobacteria 68

DCD 149
Decomposition period 65
Decomposition 1, 201, 241
Dehydrogenase activity 60, 201
$\delta^{15}N$ 81
Denitrification 21, 107, 132, 196
Denitrifying microorganisms 132
Dicyandiamide 149
Disturbance 113
DRIS 96
Drying 132

Earthworm gut 55
Earthworms 127, 185, 229
Ectomycorrhizae 259
Effectiveness of rhizobia 275
Element concentrations 165
Elevation 81
Erica tetralix 268
Erythrobacter sp. 208
Esterase 127
Eucalyptus saligna 35
Eudrilus eugeniae 16
Exchangeable aluminium 279

Farmyard manure 60
Ferric iron as electron acceptor 144
Fertility trials 241
Fertilization 1
Fertilizer N uptake 297
Firewood crops 73
Flooded rice soil 241
Flooded soil 144, 174, 235
Floodwater properties 235
Forest decline 189
Forest soil 91, 120
Freezing 132

Genetically engineered microorganisms 308
Genetically modified microorganisms 55
Glomus fasciculatum 253
Glomus pallidum 294
Glycine max 81
Green manure 65
Green manuring 241
Green-leaf manure 73
Greenhouse gas 174
Growth media 220
Growth 79
Gut content 185

^{3}H-thymidine labelling 253
Helianthus annus 96, 103
Humic fractions 127
Hydroquinone (HQ) 225
Hyperiodrilus africanus 16

Indicator organisms 189
Indigenous populations 196
Intercropping 215
Iron reduction 137, 144
Isolines 81

Labelled iron oxide 144
Laboratory incubation 279
Laccaria laccata 259
Leaching patterns 308
Leucaena leucocephala 16
Lime 120, 165, 249, 301
Liming 45, 91, 279
Liquid manure 137
Litter decomposition 28
Litter 268
Litterfall 35
Lowland rice 235
Lumbricidae 165
Lumbricus rubellus 165
Lumbricus terrestris 55

Macronutrients 73
Maize 153
Manganese 9
Manures 285
Melanins 220
Mesofauna 301
Methane emissions 174
Methane formation 137
Methyl isocyanate 79
Microarthropods 113, 165
Microbial biomass 60, 113
Microcosm 113
Microcosms 308
Microfungi 91
Microorganisms 9
Migration 201
Mites 189
Mitigation 174
Moder 301
Molinia caerulea 268
Mollisol 50
Movement 201
Mucuna aterrima 153
Mutualistic digestion 185
Mycorrhiza 103

^{15}N 215, 225, 285
N availability 50
^{15}N balance 235
N benefit 39
N extraction 179
N fertilizer requirement 249
N fertilizers 50
N immobilization 50, 161
^{15}N immobilized fertilizer 179
N interaction 50
^{15}N-labelled fertilizer 297
N mineralization 50, 120, 179, 249, 285
N sparing 39
N transfer 39
N uptake 285
N-(n-butyl) phosphorothioic triamide (NBPT) 225
N-(n-butyl) thiophosphoric triamide 235
N-supplying ability 215
N_2 fixation 215
N_2O production 196
N_2O-reductase 107
Neem cake 149
Nematodes 113, 201
Nicotiana plumbaginifolia 127
Nitrate leaching 120
Nitrate-N 249
Nitrate 132
Nitrification inhibition 149
Nitrification 21, 28, 87, 120, 249
Nitrifying population 87
Nitrogen fixation 35, 73, 81, 208, 275
Nitrogen immobilization 1
Nitrogen mineralization 28, 268
Nitrogen 153

Nitrogenase activity (acetylene reduction assay) 68
NO consumption 21
NO production 21
Nodulation 73, 294
Non-nodulating 81
Non-sterilized soil 294
Nostoc 68

Organic C 229
Organic carbon 132
Organic fertilization 165
Organic matter stability 279
Organic matter 241
Oryza sativa L. 235

Paddy-upland rotation 196
Peanuts 275
Peroxidase 127
Phenyl phosphorodiamidate (PPDA) 225
Phosphatase activity 60
Photosynthetic bacteria 208
Physicochemical factors 185
Pine 259
Pinus sylvestris 120, 189
Plant forest litters 28
Plant nutrition 96
Plant residues 132
Plants 132
Polysaccharides 229
Pontoscolex corethrurus 35
Population density 45
Population dynamics 55
Prilled urea 149
Priming effect 285, 297
Propionate 161
Protozoa 201
Pseudomonas fluorescens 55, 308
Pseudomonas spp. 253
Pseudotsuga menziesii 120

Quercus robur 120, 279

Rain 16
Ranker 279
Reliability of AIT 107
Residual fertilizer N 179
Respiration 185
Rhizobacteria 259
Rhizobia 294
Rhizobium 45
Rhizodeposition 259
Rhizosphere 113
Roseobacter denitrificans 208
Ryegrass 225
Sesbania spp. 73, 241
Sesbania rostrata 208
Shade 16
Simulation modelling 1
Soil acidification 165
Soil acidity 45
Soil enzymes 60
Soil microarthropod communities 189
Soil microbial 301
Soil moisture content 268
Soil moisture 1
Soil N uptake 297
Soil organic matter 103, 268
Soil pH 249
Soil phosphorus fractions 279
Soil washing 91
Soluble organic compounds 259
Soybean 196
Soybeans 81
Species composition 91
Species effect 268
Stem nodules 208
Straw 65
Streptomyces spp. 220
Subsoils 132
Subtropical soil 87
Sulfide fixation 137
Surface casting 16
Symbiosis 68

Temperature optimum 21
Tensile strength 229
Texture 229
Tissue culture 127
Trifolium 45
Triticum vulgare 68
Tropical soil 87, 220
Turnover 60

Urea hydrolysis 65
Urea N efficiency 225
Urea 235
Urease inhibitors 225

VAM fungus 294
VAM response 103
VAM 96
Vesicular-arbuscular mycorrhiza 253

Water-stable aggregation 229
Wetland rice 174
Wetland soil 65
Wheat 9, 68, 297
Wood ash 91

Zea mays 96, 103, 249
